28 Nakshatras - The Real Secrets of Vedic Astrology (An e-book)

In the Vedic (Hindu) system of Astrology, known in Sanskrit as Jyotish, the 27 constellations and not the 12 star-signs are the key to understanding celestial influences on our planet. These 27 constellations are known as the 27 Nakshatras, which are 300 to 400 light years away from earth. Based on a person's moon Nakshatra at the time of birth, Jyotish offers a most powerful predictive technique compared to other forms of astrology.
